

Turn your home into a winter wonderland!

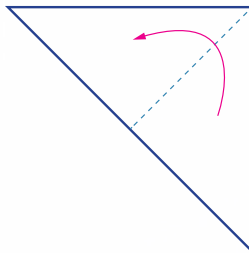

Tinker your own star

1.

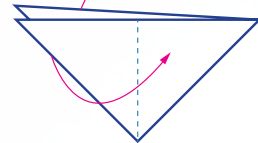

Take a square sheet of paper in your favorite color and fold it in the middle.

2.

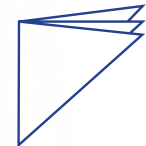

You get a triangle – fold it in the middle again.

3.

Now fold the front and rear triangle – we're sure you already guessed it! – in the middle once more.

4.

If you've followed all the steps correctly, you get a shape like this.

5./6.

Now cut the shown magenta-coloured pattern into the paper and you'll get the blue marked shape. Open it ...

... and you get a beautiful Christmas star! Of course you can experiment with other cutting patterns as well to get different designs. Enjoy!
